

# HOT ROCKS

## *BIOGRAPHY*

## **HOT ROCKS**

Another tribute band you say? Not quite.

HOT ROCKS was created with a single purpose - to deliver the most authentic and exciting replication of a contemporary Rolling Stones concert possible.

The distinguishing feature of HOT ROCKS is that it is the only tribute to the Stones that focuses on a visual as well as a musical presentation of the Stones in concert as people know them today. From the performance on stage, right down to the clothes and the jewelry, the attention to detail demonstrated by this band is what makes the audience say "It's just like watching the Rolling Stones!".

In addition to all of the absolute classics such as Brown Sugar, Jumping Jack Flash, and Satisfaction, to name a few, Hot Rocks' repertoire also includes recent hits such as Rough Justice and Streets of Love.

Available for club engagements, weddings, and private parties, Hot Rocks is also especially effective at providing a unique and captivating show for corporate clients that will make an evening to remember for all of your guests. Full sound and lighting production can be provided for events of any size. Hot Rocks also has the flexibility to augment the core band with additional, professional musicians including a full horn section to meet a client's particular needs.
